

There is a rare case which debugger doesn't startup with showing below message in [Console] view, when debugger is repeated to startup and terminate.

Debugger is in operation. Please terminate the debugger.

In this case, please push ■ [Terminate] icon to terminate debugger.

If it cannot solve this problem, please push [Ctrl]+[Alt]+[Del] keys to start the Windows task manager. And select gdb.exe process in [Process] tab and push [End process (E)] button.
